

Backland Development Report Suggested Amendments from Rob Salmon, Head of Plans and Policies

1. Following the completion of the draft report, it was circulated to Rob Salmon and Paul Clarke to ensure that the technical language was correct and that the recommendations were feasible.
2. The following amendments reflect the changes Rob would wish to see in order that the recommendations could be implemented and are technically correct.
3. When considering Item 10 on the Planning and Transportation agenda you may wish to make reference to these suggested amendments.
4. As there are a lot of suggested amendments and it is sometimes difficult to read with the track changes included, I have attached a set with the track changes included and then without in the following pages.
