# ITEM 7

Report of the Sustainability and Transformation Partnership

### Joined Up Care Derbyshire Workstream Update - Place

#### SUMMARY

- 1.1 Place is one of the eleven workstreams set up to drive forward the model of care set out in the Derbyshire Sustainability and Transformation Plan (STP), also known as Joined Up Care Derbyshire.
- 1.2 Place is about empowering people to live a healthy life for as long as possible through joining up health, care and community support for people and individual communities. It is essential to the successful delivery of the Joined Up Care Derbyshire priorities.
- 1.3 A working group has been established to take forward the thinking around these key areas including the number of the places.
- 1.4 Over the last few months conversations have taken place with the 21 places around reducing the places to a more viable number which will support the delivery of tailored health and care solutions to each areas population needs. This is being considered at the Joined Up Care Derbyshire Board on Thursday, March 15<sup>th</sup>.
- 1.5 The working group has also further defined the main areas of work for each of the places:
  - Empowering people with multiple health and social care needs to actively manage their own solutions, allowing them to live the most healthy, happy and independent life as possible.
  - To support people to be treated in the right place, at the right time and without the need to be cared for in hospital.
  - Joining up all organisations across the system, using best practice to coordinate consistent care and support for people across Derbyshire.
  - Focus on local areas needs and tailor support to make sure it has the biggest impact on improving people's health and wellbeing.
- 1.6 A Governance structure to support the development of Place is also being established to support the delivery of the key deliverables during 18/19.
- 1.7 At the Health and Well Being Board we will provide more detail about the places, the key areas of focus and confirm the governance.

## RECOMMENDATION

- 2.1 To note the update on the Joined Up Care Derbyshire Place workstream.
- 2.2 To consider the role of the HWB in supporting the development and implementation of Place.

## REASONS FOR RECOMMENDATION

- 3.1 To ensure the Health and Wellbeing Board remains fully briefed and involved in the ongoing development and delivery of Joined Up Care Derbyshire.

## SUPPORTING INFORMATION

- 4.1 For more information about Joined Up Care Derbyshire visit [www.joinedupcarederbyshire.co.uk](http://www.joinedupcarederbyshire.co.uk)

## OTHER OPTIONS CONSIDERED

- 5.1 None

## IMPLICATIONS

### Financial and Value for Money

- 1.1 One of the key purposes of the STP is to achieve a financially sustainable health and social care system for the people of Derbyshire.

### Legal

- 2.1 The local NHS are required to have a STP in place for the Derbyshire footprint and have a responsibility to ensure appropriate involvement of the HWB.

The HWB has a duty to improve the health and wellbeing of its population and reducing health inequalities which is in line with the objectives and programmes set out in the Derbyshire STP.

### Personnel

- 3.1 This paper has no workforce implications. Workforce planning, however, is a key element of the STP.

### IT

- 4.1 The Local Digital Roadmap (LDR) and associated programme of projects will provide the IT infrastructure and developments required to support delivery of the STP. Responsibility for the LDR sits with the Derbyshire Informatics Delivery Board.

### Equalities Impact

- 5.1 The STP sets out the local health and wellbeing gap – or health inequalities. A primary objective of the STP is to reduce health inequalities across Derby and Derbyshire.

### Health and Safety

- 6.1 N/A

### Environmental Sustainability

- 7.1 N/A

### Property and Asset Management

- 8.1 The effective use of NHS estates and other assets is a workstream within the STP.

### Risk Management and Safeguarding

- 9.1 There are currently significant risks to the delivery of health and social care within Derby and Derbyshire. The STP aims to minimise these risks and deliver a sustainable system. There are, however, significant challenges to its delivery and requires a fast pace of change which has some inherent risks. Management of these risks is incorporated within the established governance arrangements.

### **Corporate objectives and priorities for change**

- 10.1 Delivery of the plans set out in the STP will support the corporate objectives of the organisations represented within the plan, including Derby City Council – most notably in relation to improving health and wellbeing.
