

Question for Disabled People's Diversity Forum Meeting 14 May 2009

In view of recent developments with rickshaws is it possible to have rickshaws on the agenda for the May DPDF meeting please. Would it be possible for anyone from the licensing committee to explain to us exactly what was agreed and why, also someone from highways to explain who made the decision regarding the experimental traffic order, and why the clear recommendations made in the equality impact assessment on rickshaws were not followed.

There is increasing frustration regarding equality impact assessments - people feel that they put a lot of time and effort into these, only for them to be apparently ignored. This is something that the forum may well want to look at in more detail at a future meeting.

Thanks

Judi Bateman
