29/17 Heritage and Public Art Engagement for Our City Our River, Chester Green

The Committee were asked to consider a report of the Strategic Director of Communities and Placedetailing proposals for public art work concepts for the Handyside section of the OCOR flood defence works. CAAC were asked to comment on the heritage interpretation of the art works, design and proposed materials. Concerns were raised about the proposed material and long term management of it. CAAC questioned whether it could be cleaned down in the event of vandalism. Discussion took place over whether the design being etched would last and if lettering and images would continue to be sharp in definition and whether 3D or bas relief approach would be more substantial.

CAAC felt more Roman bathhouse information could be incorporated adjacent to the Scheduled Ancient Monument (next to the cricket pavilion). It was suggested more interpretation boards could be installed on the fort, bath house and sites of the general archaeology finds in the area through the digs, detailing the history of the area.

Resolved to:

- 1. Note the report and attached appendix detailing the ideas, for artwork, generated by local input.**
- 2. Feed back the comments and concerns expressed by CAAC to the Public Art Officer**

The Committee felt that the extension is at odds with other extensions along the row as they were currently uniform in design. The Committee felt a more appropriate design of extension could be submitted of lesser footprint.

Object and recommend refusal

CAAC felt the size of the extension being too big. It was also felt the design did not enhance or preserve the character or appearance conservation area.

The heritage statement was limited and had not looked at historic photos to inform the proposed design. All changes need to be justified. It is possible that the original form would have been a 2 bay frontage with a door one side and a window to the other. Any render needed to match that to the upper parts of the building and be lined out to match. The current proposal did not preserve or enhance the character of appearance of the conservation area.
