

PROTECTING VULNERABLEADULTS BOARD 25October 2016

Report of the Strategic Director of People Services

LocalAreaCo-ordinationinDerby- Update

SUMMARY

- 1.1 Localarea coordination (LAC) beganin Derbyin 2012 aspartoftheadultsocial care personalisationprogramme, buildingsocial capital. It is nowakeys ervice in meeting the Council's legal dutyto prevent, reduceor delay the need for care and support. LAC is now acting as one of the first response services to requests for social care received by Derby Direct. LAC is also contributing to the delivery of the NHS sustainability and transformation plan and meeting the Health & Well-Being Board's commitment to engaging and empowering communities across the city.
- 1.2 The 2013DerbyUniversityevaluation of local area coordination demonstrated that with just two staff inpost,£800,000 was being saved by the healthand social care economy as are sult of people's use of the formal system being delayed or diverted entirely.
- 1.3 An independentevaluationfundedby 'Think Local, ActPersonal' published inMarch 2016 evidenced thatthe Councilandthe NHSare receiving a 400% social returnon their investment in local area coordination.
- 1.4 In March 2016 I reported that there were ten local area coordinators in tenwards ofthe city, with 60% of thefunding provided bythe NHSthrough better care fund and 40% bythe Council. Scrutiny Members at the time expressed theambition to expand localarea coordinationacross all wards ofthe city.
- 1.5 This ambition to expand LAC was also approved by the community support delivery group of the NHS Joined up Care programme, subject to funding.
- 1.6 In order to expand LAC to all wards of the city, there is an annual additional cost of £314k per annum.
- 1.7 Whilst the ambition is there to expand LAC and the benefits are evidenced, the finances of both the local authority and the local health community do not allow for this investment at this time. However, there may be an opportunity with the expanded better care fund due for release in 2018/19.

RECOMMENDATIONS

- 2.1 TonotethattheHealthandWell-BeingBoardhasagreed tocontinue toprovide strategic leadership inengagingand empoweringcommunitiesacross the City.
- 2.2 Tonote theprogress that isbeingmade in thecityto developstrong, healthyand inclusive communitiesthrough local areacoordinationasevidencedbythe social return on investmentevaluation published inMarch2016.
- 2.3 Tosupportofficers in exploringallpossiblefundingsourcestoenablethe expansion oflocalarea co-ordination acrossallseventeen city wards.

REASONS FORRECOMMENDATION

- 3.1 On10 June2015CouncilCabinetaccepted the 9June 2015CorporateScrutinyand GovernanceBoard recommendations tocommend theLocalArea Coordination service, that itwould like to seefuture expansion of the service across the cityto includeall17 wardsand thatan evaluation report is submittedtoameetingofthe Protecting VulnerableAdultsBoardfor reviewand toassist in identifyinghowthis couldbe achieved.
- 3.2 On19 November 2015 theHealth &Well-BeingBoard agreedtocontributeto andprovide strategic leadership and committothedevelopment ofstronginclusive communities andtosupport andactivelyadopttheFrameworkfor developingstronginclusive communities asestablishedby ThinkLocal, Act Personal (TLAP) and Public Health England (PHE).

SUPPORTING INFORMATION

- 4.1 There is agrowingappreciation of the importance of communitycapacitybuildingin deliveringkeychange agendasacross thehealth and care system and for wider public service reform. Opportunities are emerging for strengthening the role of community capacity building in achieving sustainable health and well being.
- 4.2 The adult social care leadershipteamknowthevalues underpinninglocal area co-ordination are the sameas thosethat underpinned an authenticapproachtopersonalisation, such as:
 - supportingpeople to get a life, nota service

- recognisingandbuildingon the experiences, skills, gifts and assets that people have around them, and
- enablingpeople to take control byself-directingor self-managingthe solutions totheirsituation.
- 4.3 As are sult, officers used the social care reformgrant to commence local area coordination in Alvastonand Arboretum. Derby University evaluated the work and reported that local area coordination was working effectively in Derby. Over a period of 10-12 months, working with approximately 50 people, the evaluation estimated an £800,000 saving to the health and social caree conomy as a result of people's use of the formal system being delayed or diverted entirely.
- 4.4 The datawas used toproduce abusiness case. Withstrongsupport from Southern Derbyshire Clinical Commissioning Group (SDCCG), local area coordination became a keypart of Derby's Better Care Programme. In 2014, seven local area coordinator posts were established within the assessment, enablement and support planning (AESP) service within the Directorate, three of which were funded by SDCCG. In 2015 a further three posts were established, with additional NHS funding. The 2015- 2016 budget for the current local area coordination team, including its manager, is £509,003,60% of which is funded by the CCG(£300,000) and 40% by the Council (£209,003) from its adult social care staffing budget.
- 4.5 Localarea coordination is akeyCouncilservice inmeetingits statutoryduties within the 2014 CareAct to prevent, reduce ordelayneeds. The local authority's responsibilities for prevention applyto all adults, including:
 - people who do not have anycurrentneedsfor care and support;
 - adults with needsfor care and support, whether theirneeds are eligible and/or met bythe local authority or not;
 - carers, includingthosewho maybeabout to take on acaringrole or who
 do not currentlyhave anyneedsfor support, andthose with needsfor
 support which maynotbebeingmetbythe localauthorityor other
 organisations.
- 4.6 Localarea coordinators in Derbyare nowcore members oflocal NHSmultidisciplinarycommunitysupport teams thatwork withclusters of GPpractices toassist people at home toavoid hospitaladmission and getpeoplebackhome whenthey have had aperiodin hospital.
- 4.7 Localarea coordination underpinsthe self-help, prevention and communityresilience workstreamwithin the IntegratedCare DeliveryProgramme,partofthe Joined-Up Care BCF programmeacross SouthDerbyshire.
- 4.8 On10 June2015CouncilCabinetaccepted the 9June 2015CorporateScrutinyand GovernanceBoard recommendations tocommend theLocalArea Coordination service, that itwould like to seefuture expansion the service across the cityto includeall17 wardsand

thatan evaluation report is submittedtoameetingofthe Protecting VulnerableAdultsBoardfor reviewand toassist in identifyinghowthis couldbe achieved.

4.9 Analysis of who LACs have been working with:

People in receipt of level 1 support (advice, information,	3188
connection to a community resource)	
People in receipt of level 2 support (complex / crisis 1:1	677
support)	

Of the 677 complex cases that LACs have been working with:

30% (203 cases) were diverted to LAC from social workers

91.4% of the individuals seen do not go on to access social care support paid for by the Council.

- 4.10 Of the remaining 8.6% (58 people) that have then been referred to a social worker for a formal assessment, only 3% of the total number of complex cases (17 people) ended up with ongoing paid social care support.
- 4.11 The average age ofpeople supportedbylocal area coordinators is 60, with the majorityidentified asbeingeitherpeople with mentalhealth needs (38%) or older people (25%). Mostpeople supportedbylocal area coordinators live in the social rentedsector with 39% being DerbyHomes'tenants and 24% otherhousing association tenants. 31% areowner occupiers and only 4% are privately renting

"Social return on investment" (SROI)

4.12 In 2015, Think Local, Act Personal ('TLAP', the national lead for taking forward work on personalising care and support) funded an independent evaluation of LAC in Derby. Published by TLAP in March 2016, Social Value of Local Area Coordination in Derby: A forecast Social Return on Investment Analysis for Derby City Council uses an established methodology for measuring and accounting for all value encompassing social, environmental and economic costs and benefits. The analysis attributes a monetary value to represent social value. The report demonstrates that over the three year forecast period with 10 Local Area Coordinators, Local Area Coordination would deliver significant social value with up to £4 of value for every £1 invested.

The future of local area coordination in Derby & the case for expansion.

4.13 The PVAB and Council Cabinet have both agreed that local area coordination should be extended to all 17 wards across the city when a means of funding this is identified. As 40% of the people who are supported by local area coordinators are Derby Homes tenants, the funding of any expansion could be explored with Derby Homes.

- 4.14 The impact of local area coordination in Derby and the strong evidence case for its value has secured strong strategic support from the NHS and adult social care across Derby and Derbyshire, such that it has been included as a major element of the current, draft Sustainability and Transformation Plan (STP). Local area coordination is identified as the key approach to developing services around 'Place' and to developing 'Prevention' services. The draft STP proposes the expansion of local area coordination across the whole of Derby City and Derbyshire County on a ratio of one local area coordinator to 10,000 people in the population.
- 4.15 The Council has submitted a bid to the Department of Education for Innovation Funding totaling £3.7m over three years to transform how we support care leavers and young people/adults with special educational needs and disabilities which include the expansion of local area coordination. The Council was expecting to receive a response by the end of September, but the DfE confirmed this week that this has slipped. Given this bid changing the role of LACs or cutting LACs at this point could potentially impact negatively on the Council's application under the innovations fund.
- 4.16 Evaluating the impact of any further expansion of LAC In October 2016, we are meeting with a number of Universities' to explore further evaluation of LACs as a number of areas are also examining the impact they are making. In a recent evaluation of LAC in Swansea by their local University, they believe that three LACs over a 10 month period are diverting spend in the region of £1.2 million. Should Derby wish to expand LACs, we will be able to evidence that it is diverting people away from formal social care assessments and the requirements for a paid care package. Whilst this does not allow for short term budget reductions, it does enable us to be better equipped to contain pressures in the medium term, i.e. helps us manage the increasing demands on the budget.

IMPLICATIONS

Financial and Value for Money

1.1 The budgetfor the current local area coordination team, including itsmanager, is£509,003, approximately 60% of which is funded by the CCG (£300,000) and 40% by the Council (£209,003). Expanding local area coordination to all 17 wards in the citywould cost a further £314,000 (including staffing, supervisory, travel, ICT and other business costs).

Legal

- 2.1 The Councilhasalegal dutyto prevent, reduce or delayneeds undertheCare Act 2014. The local authority's responsibilitiesforpreventionapplytoalladults, including:
 - people who do not have anycurrentneedsfor care and support;
 - adults with needsfor careand support, whether theirneeds are eligible and/or metbythe local authorityor not;
 - carers, includingthosewho maybeabout to take on acaringrole or who
 do not currentlyhave anyneedsfor support, andthose with needsfor
 support which maynotbe beingmetbythe localauthorityor
 otherorganisation.

Personnel

3.1 The Council employs 10 localarea coordinators andonesocial capital manager.

Expandinglocal area coordinationtoall17 wards would require sevenlocal area coordinators andone senior practitionerpost to beestablished). Recruitment to any additional postsestablished wouldbe inlinewith the Council's recruitmentpractice, and would involve communitystakeholders intheassessment process.

IT

4.1 The localarea coordinators are based within tenwards of the city. They need IT support to function remotely. The teambudget includes the costs of their IT support.

Equalities Impact

5.1 The SROlevaluation evidences that localarea coordination increases social inclusionforcitizens. The team manager has attended the Diversity Forum and forum members have agreed to raise awareness about LAC in the community.

Health and Safety

6.1 Localare coordinatorsare largelylone workers. This ismanaged satisfactorily according to the Council's policies and procedures. The SROI evaluation makes recommendations for improving their support.

Environmental Sustainability

7.1 None.

PropertyandAssetManagement

8.1 None.

Risk Management

9.1 There is a risk that funding for the expansion of LAC cannot be secured due to the prevailing public sector financial climate.

Corporate objectives and priorities for change

10.1 Localarea coordination supports the delivery of the Council's ambition to build strong, resilient communities where people are empowered.
