

Public Health Outcomes Framework Detail Report

SUMMARY

- 1.1 An overview of current performance across the Public Health Outcomes Framework was presented at the Health and Wellbeing Board held on 16th January.
- 1.2 The report showed Derby's performance against each available indicator ranked in relation to the other 152 local authorities. Those indicators where Derby performed amongst the top 20% local authorities and bottom 20% of local authorities was reported.
- 1.3 Further update and detail was requested on the following indicators:
 - Fuel poverty
 - Low birth weight of term babies
 - Infant mortality
 - Take up of NHS Health Check programme.
- 1.4 **Fuel poverty** – Derby performs significantly worse on this measure than the national, regional and 'family' group comparators, although has followed a similar trend and saw a slight reduction in the latest reported figures.
- 1.5 **Low birth weight of term babies** – Derby performs significantly worse than England and the regional average but comparatively to its family group.
- 1.6 **Infant mortality** - Derby performs significantly worse than England and the regional average but comparatively to its family group.
- 1.7 There is notable variation between Derby wards on all the above indicators.
- 1.8 **Take up of NHS Health Check programme** – Derby performs significantly worse on this measure than the national, regional and family group comparators. A primary reason for this is that the proportion of the eligible population offered a Health Check is comparatively high in the city. This means that although there may be a similar proportion of the overall eligible population taking up Health Checks (previous indicator definition), the proportion of those eligible offered and taking up is lower. There is considerable variation between general practices in the level of uptake.

RECOMMENDATION

2.1 To receive and note this report.

REASONS FOR RECOMMENDATION

3.1 This report is provided for information to the Board.

SUPPORTING INFORMATION

4.1 A briefing paper will be provided to Board members to provide additional detailed information.

OTHER OPTIONS CONSIDERED

5.1 None

This report has been approved by the following officers:

IMPLICATIONS

Financial and Value for Money

- 1.1 Performance against individual and groups of indicators can provide an insight into the value being achieved in outcomes in relation to expenditure.

Legal

- 2.1 There is no statutory requirement that the Health and Wellbeing Board has oversight or accountability of the PHOF, but it is expected that the Board has some means of understanding local performance and progress in improving the health and wellbeing of its population and reducing health inequalities.

Personnel

- 3.1 No issues directly arising.

Equalities Impact

- 4.1 A number of PHOF indicators are specifically to gain a measurement of health inequality.

Health and Safety

- 5.1 No issues directly arising.

Environmental Sustainability

- 6.1 No issues directly arising.

Asset Management

- 7.1 No issues directly arising.

Risk Management

- 8.1 This paper gives an overview of performance against a range of PHOF indicators which will provide the Board with a view of potential poor performance which may result in increased external scrutiny and reputational risk.

Corporate objectives and priorities for change

- 9.1 Indicators within the PHOF will support in understanding delivery against the Council Plan; Derby Plan; Health and Wellbeing Strategy.
