34/16 Christianity Project

SACRE received a presentation from Alison Brown on the Understanding Christianity resource.

SACRE were provided with an introduction to the Understanding Christianity resource. It was reported that eight core concepts at the heart of Christianity had been identified that pupils needed to understand and that these told the story of the Bible. It was also reported that pupils would encounter these concepts a number of times as they moved through school. It was noted that to build up their

understanding, 'knowledge building blocks' relating to each concept had been identified.

It was reported that pupils would encounter these concepts, and teachers would teach them through key questions, using a model with the following three elements:

- making sense of the text;
- making connections; and
- understanding the impact.

It was also reported that each pupil's development in these three elements would be assessed against end-of-phase outcomes.

Members noted that the Understanding Christianity Resource Pack offered support to develop teachers' confidence with the subject content and provided a wide range of classroom learning ideas and resources to enable and deepen pupils' learning.

Members agreed that the core structure for learning was the Agreed Syllabus and noted that the Understanding Christianity resource supplemented it.
