

COUNCIL

30 March 2011

Motion

“Council is concerned about the continued problems with bins on streets, fly tipping, fly posting and other environmental crimes and notes the increased concerns of residents in Arboretum, Abbey and Normanton Wards amongst others.

In order to address these longstanding matters of environmental and street scene disorder, Council requests Council Cabinet to look in to ways of utilising existing enforcement staff or officers to develop an enforcement team and policy on these environmental concerns which would have the power to impose swift penalties on those causing such environmental degradation in our City.”
