- 5. Financial analysis
- 6. Summary for the proposal
- 7. Appendices containing further information and initial pricing structure

Introduction

This document summarises a proposal for the County Council Outdoor Education Service to undertake work within Derby city on behalf of Derby City Council; to create a partnership that effectively expands the provision available to city schools and council services to offer outdoor learning and development to young people and adults. In undertaking an initial(SWOT) assessment in order to produce realistic and effective proposal we have sought to make an objective evaluation of the current position. It is not intended to be overtly critical and we acknowledge how open and objective staff members have been at every level when discussing the current situation and the limitations of the current operation.

Aims.

The aim is to work in partnership with Derby City Council to transform Outdoor Education (OE) delivery within Derby city, including operations at Darley Barn and the Duke of Edinburgh's Award to ensure they arecost-effective, fit for purpose, are robust in terms of both safety and quality management that they and meet the needs of schools and other organisations and groups within local Derby communities.

Our medium term objective would be to transform the nature of provision to support its own operation. In the longer term we aim to create a vibrant and innovative source of outdoor education, organised on commercial principles and able to produce a financial as well as a social return on any investment.

Initial Action Plan

- Establish a partnership agreement to operate and provide activities within the city
- To quickly be able to offer schools an initial menu of outdoor education and Learning outside the Classroom opportunities
- In partnership with Derby City Council, undertake a consultation process with schools, clubs and community organisations to establish what they perceive their needs to be, and how any provision could provide clear learning and participation pathways for young people and families
- Develop a longer term plan for the delivery of the Duke of Edinburgh's Award and high quality outdoor learning activities in partnership with the city council and schools that meets the needs of young people and families
- Create a pricing structure that operates to a breakeven formula that is affordable to families and groups and that reflects value and market competitiveness
- Develop a Marketing Plan to promote and publicise opportunities and to engage with schools and other council departments

SWOT Assessment

A number of factors have been considered in the analysis. In order to provide a clear summary, we have used a format that concentrates on looking at the strengths and weaknesses of the current situation, and have considered what we believe to be the current threats and, more importantly, the potential opportunities to develop the service (aSWOTanalysis).

Strengths:

Derby City Council has a strong track record for delivering sport and outdoor recreation opportunities, which is reflected in council policy. Both the management and leadership of the council support outdoor activities and the contribution they provide to lifelong health and wellbeing. A number of initiatives in sport and leisure are taking place within the city including projects in Markeaton Park, which could be linked to the provision of outdoor and adventurous activities for schools and local children. Complimenting this, the Derbyshire County Council Outdoor Education Service has a strong management team and a proven history in developing services for young people and families. We believe this is a strong basis on which the partnership could develop an effective level of innovative service delivery.

Darley Barn is a modern, well equipped facility able to facilitate a group of up to 30 people internally at any one time. The facility has disabled access throughout and consists of showers, changing rooms, equipment storage, admin office, refectory and classroom. Sufficient car parking space is available. In terms of outdoor activities equipment, whilst no detailed examination has taken place it looks like there is a sufficient amount of equipment held to accommodate a similar number to deliver nights away under canvas, canoeing, kayaking, climbing and hill walking. All equipment appears in good condition and fit for purpose.

Weaknesses:

The current vision and future of provision for outdoor educationwithin Derby is unclear. This appears to havehad an impact on the morale of current employees and has led to a state of operational 'limbo'. There is no business plan in place for the future operation of Darley Barn, which isimperative if the objective above is to be achieved. This is assessed as being of importance and immediate action is required.

There is currently only one full time member of staff(*this staff member is qualified to deliver outdoor activities*). This situation critically limits and impedes the ability of the service or Darley Barn to generate revenues in order to become financially self-sustaining. Staffing needs to be a key target area for immediate action, both for activity provision and administration and support.

Coupled with this, there is no marketing plan to define market segments, services and calls to action for access to Darley Barn. This makes it extremely difficult to promote the facility to schools, groups and other potential users.

No systematic measurement of the quality of services being provided is apparent, although Darley Barn currently holds an Adventurous Activities Licencing Service (AALS) Licence. Concern has been expressed as to the ability of Darley Barn to comply with the conditions of its licence while operating in its present state. All outdoor activities need to be compliant with National Governing Body (NGB) regulations (if applicable).

Duke of Edinburgh's Award is currently been delivered in schools, or as a small special needs unit. It is believed that in the medium and longer term, this needs to be supported with more infrastructure and training opportunities, and opportunities to mainstream young people via an 'open award' centre. The provision of suitably qualified outdoor activity leaders is a training intensive environment. Plans for continued professional development need to be in place, in order to maintain compliance with AALS and NGBs.

Darley Barnalso needs additional outdoor activity leaders in order to generate the revenue necessary to become financially self-sustaining. However, it is acknowledged that this presents its own set of financial challenges.

Systems to manage and monitor health and safety do appear to be active but clearly need updating. Outdoor education is an environment where risk is associated with every activity and demands proactive management through an active monitoring system.

Opportunities:

The current facility (Darley Barn) is located within Darley Park which is an area of green parkland surrounded by urban development. The River Derwent is very close by and the Peak District National Park is within 30 minutes travel by road. Both the grounds around the centre, the park and the existing links with the canoe club offer opportunities to develop:

- Outdoor skills
- Outdoor education
- Outdoor recreation
- Environmental education
- Environmental projects

When examining the demographic make-up of the city, we found thatDerby has a population of approximately 250,000 rising by around 7.8% since 2001 This population is clearly ethnically diverse. A wide range of schools and socially based organisations work with all the communities across the city.Therefore, there is freedom to create and deliver a range of opportunities and activities or projects catering for:

- Primary schools
- Secondary schools
- Uniformed youth organisations
- Colleges
- Universities
- Duke of Edinburgh's Award participants
- Public sector employers
- Private sector employers
- Ethnically diverse communities
- Disability groups
- Families
- Gender specific; male, female, mothers-daughters, mothers-sons etc.
- Looked after children
- Special Educational Needs
- Hard to reach groups
- Children
- Young people
- Adults
- Adults 60+

These would include programmes that help achieve:

- Healthier lifestyle development using the outdoors
- Engaging in creative projects outdoors
- Alternative education in the outdoors
- Leadership development outdoors
- Personal outdoor skills development

- Professional outdoor skills development
- Outdoor navigational skills development
- Contribution to the sustainability of the outdoors
- Knowledge of the biodiversity of the outdoors

The initial discussions and examination of Darley Barn indicated that opportunities exist to share resources with other local providers of outdoor education and recreation. These organisations offer the city and its groups theopportunity to fill gaps in provision or activities where Darley Barn or an outdoor education service is unable to meet demand due to either a lack of capacity and capability.

Potential shared resource partners include:

- Local authority providers of outdoor education
- Not for profit providers of outdoor education and recreation
- Commercial providers of outdoor education and recreation
- Sports and specialist outdoor activity clubs
- Outdoor activity NGBs
- Community, voluntary and independent youth organisations
- Universities and colleges
- Academies providing primary and secondary education
- Independent schools

Threats:

The UK economy is emerging from an extended period of financial recession. Discretionary consumer spending remains limited. The central government budget balance remains in deficit with strict budgetary cuts and financial settlements being imposed upon local government.

The current situation indicates that any activity provision development in the outdoors must be sustainable; it must become financially independent of public funding and offer a strong value proposition to its customers before any threat of service reduction or closure can be eliminated. At the same time, commercial outdoor activity providershave to improve their offerings and look for new markets in order to remain in business. This creates a market place where there are an increasing number of independent operators, partly due to limited opportunity for employment within this sector.

Analysis Conclusion:

A series of tasks need to be completed in order to remedy the weaknesses identified. Key within these tasks is the development of both a cost effective staffing structure and the need to undertake a period of consultation with clubs, schools, groups and organisations to get a clear understanding and assessment of what they want and need.

From this will come the opportunity to develop a businessstrategy and a marketing plan to exploit opportunities identified, along with the development of an overall business model where threats and the risks identifiedcan be managed appropriately:

% of total 2010-11 expenditure Actual Expenditure £ Staffing Staffing 130,620 75.84 Buildings 16,714 Buildings 9.70 Transport Transport 6,435 3.74 Equipment Equipment 18,372 10.67 IT 0.05 IT 🗖 83 172,223 100.00 Income £-108,724 Income 63.13%

2011-12 Actual Expenditure £		% of total expenditure	
			Staffing *
Staffing *	143,458	88.91	Duildings
Buildings	12,341	7.65	Buildings
•	-		Transport
Transport	1,558	0.97	
Equipment	3,995	2.48	Equipment
IT	0	0.00	∎IT
	161,352	100.00	Income **
Income **	£-91,303	56.59%	

* Includes redundancy costs of £32,541

** Includes £15,000 from Sport England - ? One-off grant. If so income as % of expenditure is only 47.29%

Financial Analysis

2012-13 Actual Expenditure £		% of total expenditure		
Staffing	29,058	67.12		StaffingBuildings
Buildings Transport	11,617 1,011	26.83 2.34		Transport
Equipment IT	1,607 0	3.71 0.00		■ Equipment
11	43,293	100.00		TI
Income	£-14,102	32.57%		Income

The financial data above indicates the historical financial pricing structure that was similar to that ofDerbyshire County Council, in that approximately 30% of the cost of activities was born by Derby City Council.

The ability for the outdoor education service to generate income in order to meet its costs has clearly been reduced in the last 24 months with the reduction of staff. Whilst overall costs have been reduced, the service is only able to generate 32% of income in its current position, compared to 63% in 2010.

It will be necessary to construct an income and charging policy that seeks to cover operational costs, whilst at the same time being competitive in the current market and affordable for schools and families. This will be best achieved by staging prices to gradually bring them in line with the break-even target. It is expected that this could be achieved within the first two years.

In the meantime it would entail budget expenditure similar to the 2012/13 figure approximately £29,000 however, this would be expected to reduce by at least 50% in year two with a break-even target for the second half of year two or by year three.

Proposal Summary

As can be seen, this proposal is based on a thorough analysis of the current situation. I do believe that a partnership arrangement where service delivery is provided by the Outdoor education Service will create increased opportunities for young people and families within the City in a cost effective manner.

Whilst an initial menu of available educational and recreational courses and facilities is provided, it will be important to consult with and gain an understanding of the needs of schools and community organisations. To this end a consultation process is a key and early objective outlined within these proposals.

During this period we would also review the activities and infrastructure that is in place and consult both the Adventure Licensing Service and The Headquarters of the Duke of Edinburgh's award to ensure plans take into account their requirements for licensing and systems needed for a high quality delivery model.

I have attached appendices to this proposal that displays a proposed initial menu of opportunities and courses along with a pricing structure. Though both the menu and the pricing structure will be reviewed as part of the consultation process, and then agreed with the City Council going forward. I also enclose a proposal document of how we would provide information for schools and groups on an independent and stand-alone website.

I would be more than happy to discuss this further with you, should you wish, or indeed to answer or clarify any points you may have.

Ian Price Head of Sport & Outdoor education Children and Younger Adults Dept.
