

‘Turning Vision | **Into Reality**’

## The world's only combination of first responder emergency, information broadcast and interactive communication.

### iHELP Totem:

- Temperature controlled (from -40°C to +75°C)
- Integrated automated external defibrillator (AED)
- Double sided multimedia face (two large, 65" LCD monitor, vandal proof construction) for broadcast of public information
- Interactive face / Wi-Fi, 3G and automatic alarm of the trained responders

### Added features

Side Touch Screen	Gives possibility of interacting with audiences via 18,5" or 22" side touch screen
Touch Screen	Enables applications to respond to user input
IP / USB Camera	Enables impact measurement and advanced digital signage systems
Bluetooth	Enables proximity marketing and Bluetooth based interactive applications
Wi-Fi (Hotspot)	Provides Wi-Fi access for users and additional communication channel for network owner
Mobile connection	Provides mobile connection (3G)
UPS	Uninterruptible power supply protects the system from sudden power shortage and potential data loss
OS - Windows	Preinstalled Windows 7 professional
Ambient light sensor	Adjusts LCD brightness depending on the ambient light level
Anti graffiti	Special coating allows easy removal of graffiti without damaging surface
Custom design	Custom housing colour design and custom branding

### 2x sun readable Full HD (1080p) display with high contrast and luminance

- Resolution 1.080 x 1.920 px Full HD
- Brightness 700 nits
- Contrast ratio 4.000:1
- Contrast / Brightness coefficient 5,7
- Viewing angle 178°/178°
- Anti-reflection glass with less than 1% reflection
- Optimal environment within enclosure enables maximum LCD performance

### Highly reliable and robust DOOH network element

- Advanced IP 65 enclosure with intelligent electronics and thermodynamics technology assures longevity of elements integrated within motion thus prolonging product life time and delivering optimal functioning of LCD display
- software enables remote monitoring, supervision and control of all devices within motion
- Professional LCD display is designed for 24/7 operation guarantees minimum 50.000 hours life time
- Steel housing and aluminum masks with 6 + 6 mm laminated / tempered glass protects inner system from vandalism
- Special anti graffiti protection coating add-on allows easy removal of graffiti without damaging surface
- High performance digital signage specialized industrial computer guarantees reliability even with most demanding of digital signage contents
- 2 year 24/7 operating warranty - For warranty to be valid, customer should acquire Infinitus d.o.o. technical maintenance certificate and perform regular maintenance activities as prescribed by Infinitus d.o.o.
- Watchdog timer for industrial computer.

WEIGHT: 400KG
