## ing to Comment on the Statement of Principles

<b>Comments on the Statement of Principles as a Whole or Particular Section</b>
It is all non sensible, the increase of gambling outlets has definitely deteriorated derby citizens through this disgusting , addictive habit
(Indicated they wished to make a comment, but failed to complete the required field)
It would be a considerable benefit (to residents in particular) if a summary was provided which explained how the local authority can be enabled to address social and welfare issues without reliance on the gambling businesses to provide a risk assessment. A criticism so deficiency is the ease with which premises can open with minimal obligations relating to change of use. The critical issue is not large 'family venues' but local betting <u>shops geared to deriving revenue in deprived areas</u>
This duplicates several points in itself i.e. repeats requirements, sometimes a few paragraphs apart. I suspect this is more likely because of persons failing to understand or read points in previous versions and/or to emphasise new expectations (such as sharing <u>their risk assessments</u> ) rather than errors in it's production.
I think gambling would go underground if banned but needs strong control.
The principles are only useful if vigorously enforced and applied.

### Appendix 3

<b>Officer Comments</b>
No specific comment about the Statement - no revision required
Not applicable
No specific comment about the Statement - no revision required
No specific comment about the Statement, but any obvious duplication will be removed
No specific comment about the Statement - no revision required
No specific comment about the Statement - no revision required
